

FINAL COMPLETE PROJECT LIST

◆ Core Hardware

1. **Samsung 990 PRO SSD 1TB PCIe 4.0 M.2 Internal SSD**
 - ₹26,999
2. **KKSB Raspberry Pi 5 M.2 HAT Case (Aluminum Enclosure)**
 - ₹3,853
3. **Raspberry Pi Active Cooler for Raspberry Pi 5 (SC1148)**
 - ₹710
4. **Raspberry Pi 5 8GB RAM SBC (BCM2712, Cortex-A76)**
 - ₹14,739
5. **VERGEENO Nvidia Jetson Orin Nano Super Development Kit (8GB LPDDR5)**
 - ₹82,999

◆ Networking & Extras

6. **TP-Link 5 Port Gigabit Smart Switch (TL-SG105E)**
 - ₹1,699
7. **EVM 512GB NVMe M.2 SSD (PCIe Gen 3x4)**
 - ₹8,499
8. **TP-Link UE300 USB 3.0 to RJ45 Ethernet Adapter**
 - ₹1,099
9. **UGREEN Cat 6 Ethernet Cable (1 Meter)**
 - Qty: 3 → ₹2,358

◆ Power

10. Raspberry Pi 5 Official 27W USB-C Power Supply

- ₹1,512

◆ AI Tools Budget (New Addition)

11. Cloud GPU Credits (Colab / AWS / Paperspace)

- ₹12,000

12. AI APIs (OpenAI / HuggingFace)

- ₹6,000

13. Datasets / Security Resources

- ₹4,000

14. Monitoring / Hosting (Grafana / Kibana / Cloud)

- ₹3,000

15. Buffer / Misc AI Expenses

- ₹5,000

💰 FINAL COST SUMMARY

◆ Hardware + Networking

Category	Amount (₹)
Core Hardware	1,29,300
Networking & Extras	15,167
Subtotal	₹1,44,467

◆ **AI Tools Budget**

Category	Amount (₹)
----------	------------

AI Tools Total	30,000
----------------	--------

✓ **FINAL GRAND TOTAL**

Section	Amount (₹)
---------	------------

Hardware + Networking	1,44,467
-----------------------	----------

AI Tools	30,000
----------	--------

TOTAL PROJECT COST ₹1,74,467

🧠 **Final System Overview**

This setup now includes:

- 🧩 **Edge Computing** → Raspberry Pi 5
- ⚡ **AI Processing** → Jetson Orin Nano
- 💾 **High-speed Storage** → NVMe SSDs
- 🌐 **Network Lab Setup** → Switch + cables + adapter
- ☁ **Cloud AI Support** → Training + APIs
- 📊 **Monitoring Stack** → SOC dashboard tools
